# TECHNOLOGY

## ALPINE FIT

Alpine fit: here in SALEWA we know just how important shoes are for an alpinist, and just how much specific ergonomics and effective technical solutions make the difference on alpine terrain, right up to the last meter. For this reason when we engineer our products we always have one clear concept in mind: our footwear must be 100% BLISTER-FREE.

**Alpine fit is the product of 5 key elements:**

- 1. Ergonomics in Action**  
Foot wrapping and support of the foot for the best sporting performance.
- 2. Heel Locking**  
Heel containment to guarantee precision and prevent the formation of blisters.
- 3. Customizable Fit**  
The shoe fit can be uniquely tailored to the shape of the wearer's foot.
- 4. Climate Control**  
Optimum temperature and humidity in the shoe, even during highly aerobic activities.
- 5. Grip**  
Great grip and control whatever the conditions without compromising elasticity and durability.

# THE ALPINE FIT

100% BLISTER-FREE

# 3F = FIT + SUPPORT + FLEX

FLEX, FIT and SUPPORT, the SALEWA 3F: "Three Functions System", our trademarked technology, offers an unbeatable combination of ankle flexibility, lateral support, and perfection in fit.

## FIT

### DIVERSITY IS OUR GREATEST ASSET

We share this planet with 7.200.000.000 other people. That means 7.200.000.000 different minds and bodies. While some body shapes may be alike, our feet could not be more different. As a matter of fact, feet differ not only in length but also in width.

Some feet are wider...

and some feet are narrower.

Whatever the shape of your foot, we build boots that fit. After years of research we created gender-specific lasts, each in two different widths and half sized steps in length.

## MULTIPLE LASTS

### WOMEN - NARROW

About 30% of women have relatively narrow feet and prefer our narrow last which is 4mm slimmer than the medium one.

### WOMEN - MEDIUM

A female foot is not a smaller copy of a male foot. It has a unique shape. This is why we use women-specific lasts.

### WOMEN NARROW

### WOMEN MEDIUM

WS 5 UK Narrow: 89 mm

WS 5 UK Medium: 93 mm

### MEN - MEDIUM

Designed for the highest level of climbing performance, foot support, and control. Targeted to the majority of mountaineers with normal width feet.

### MEN - WIDE

Did you know that your feet can change their shape with time? Heavy use of your feet – through mountaineering for example – can result in a significant widening.

For those that need some extra space we offer wide lasts which are 4mm wider in the toe area.

Ideal for the coldest conditions (more room for the toes = better blood circulation).

Also accommodates a wider foot for optimal fit.

### MEN MEDIUM

MS 8 UK Medium: 99 mm

### MEN WIDE

MS 8UK Wide: 103 mm

## OUR FOOT IS A THREE-DIMENSIONAL SHAPE. IT IS DEFINED BY LENGTH, WIDTH, AND HEIGHT.

Only SALEWA offers a footbed that allows individual customization of the fit by adding or removing the yellow MFF layer.

## MULTI FIT FOOTBED

MEDIUM  
FIT

WIDE  
FIT

## MULTI FIT FOOTBED +

NARROW  
FIT

MEDIUM  
FIT

## CLIMBING LACING

**CLIMBING LACING:**  
More accurate lacing in the toe area gives more support and performance.

## 3D LACING

**3D LACING:**  
Dividing the shoe into three areas allows the athlete to fine-tune between comfort and performance.

# SUPPORT

## ALPINISTS GO WHERE OTHERS DON'T

We endeavor to cross the most challenging surfaces on the planet. When you're moving sideways at steep angles, your ligaments are pushed to the limit.

SALEWA footwear provides full support while still offering freedom of movement.

# FLEX

## FOOT SUPPORT ENGINEERING

## TESTING IN ALPINE CONDITIONS

## HEEL FLEXIBILITY AND SAFETY ARE MANDATORY FOR THE MODERN MOUNTAINEERING

The greatest mistake is to limit the freedom of movement of an athlete's foot.

At SALEWA we believe nature is the best designer, so why change perfection?

We offer freedom of movement where the mountaineer needs it and provide hold where it's needed too.

**3F  
VARIO**

# 3F VARIO

## TURNS SHOE TO SANDAL

One simple move transforms this lightweight approach shoe into a comfortable sandal. Perfect companion for all climbing activities - protects the foot and is very comfy

# CLEANSPORT NXT

**DID YOU KNOW THAT FOOT ODOR IN SHOES IS NOT CAUSED BY SWEAT, BUT BY THE BACTERIA WHICH FEED ON IT?**

In order to neutralize foot odor we use "good" microbes, which feed on those microorganisms which cause it, transforming sweat into water and CO<sub>2</sub>.

This is an innovative, non-toxic and completely bio-friendly treatment called CLEANSPORT NXT. 100,000,000 self-activating good microbes are applied to every square cm of the lining, thus creating a protective layer which is ready to react as soon as our fabric comes into contact with sweat, thus keeping shoes fresh and ready to use.

# Controls Odor... Naturally

Learn more at  
[cleansportnxt.com](http://cleansportnxt.com)

# MEMORY FOAM

The boot immediately conforms to the ankle and offers all-over comfort without gaps, thanks to memory foam padding.

## PRIMALOFT®

### PRIMALOFT® PADDING

Feet stay warm and dry thanks to Primaloft® padding, which is very breathable and barely absorbs any moisture. The special combination of warm insulation and compactness allows the volume and weight of both the cushioning and the boot to be kept as low as possible.

# SURROUND™

THE NEW GORE-TEX®  
PRODUCT TECHNOLOGY

SURROUND™  
Product Technology

## HIGHTECH FOR YOUR FEET

During adventure trips or daily life, GORE-TEX® footwear with **SURROUND™** Product Technology provides perfect climate comfort - so not only do feet stay dry, they also stay nice and cool.

The innovative sole structure on these shoes blends prominent functionality with contemporary design.

## EXTENDED PROTECTION

GORE-TEX® shoes with **SURROUND™** product technology have a special GORE-TEX® laminate lining that is integrated into the shaft and surrounds the foot - from above as well as from below. Together with the open sole construction, an absolutely waterproof and all-round breathable shoe is created.

## TOTAL COMFORT AND MAXIMUM PROTECTION.

The innovative structure of the shoe uses a laminated GORE-TEX® lining which is incorporated into the upper, and which exploits a special radiator to facilitate the circulation of air under the ball of the foot, whilst at the same time the shoe remains completely waterproof and breathable.

**BREATHABLE  
PROTECTION**

keeps feet dry and cool

# ALPINE GRIP

A sure and reliable grip is essential for all mountaineers. That's why with our best partners we develop special outsoles designed for specific uses and terrain. That serves to guarantee the best possible traction, lifespan and comfort.

VIBRAM®  
SALEWA PRO

VIBRAM®  
TETON

## MOUNTAINEERING

Grip, precision and long-lasting wear allow you to confidently master the most demanding passages on rock, in slushy snow, or on icy sections. An asymmetrical tread profile offers among other things a higher level of performance when on the mountain.

VIBRAM®  
NEW MULAZ

VIBRAM®  
MULAZ

VIBRAM®  
ALPINE APPROACH

VIBRAM®  
SCRAMBLER

## VIA FERRATA

Traction, secure footing and firm support: This type of sole is ideal for conquering via ferrata's as well as scree fields and rocky stretches. This is made possible by a tread profile developed just for this purpose. A large surface contact area ensures firm grip on rock and Alpine terrain while at the same time enabling secure footing on a via ferrata's "iron road."

VIBRAM®  
TECH APPROACH  
EVO/MEGAGRIP

VIBRAM®  
TECH APPROACH

### APPROACH

High precision and traction on wet and slippery rock: SALEWA approach soles have been developed to allow you to master ascents of moderate difficulty while promoting a flexible toe-off as well as a natural movement of the foot while hiking.

VIBRAM®  
HIKE APPROACH

VIBRAM®  
RGS

### TREKKING/HIKING

Secure support, flexibility and long-lasting wear: These outsoles have been specially developed to be there for you on the most challenging hikes. Thanks to research into the biodynamics of hiking, toe-off is easier, guaranteeing the best possible comfort even after hours on Alpine terrain. The outsoles have been coupled with materials that have outstanding shape memory so they do not lose cushioning properties over time.

VIBRAM®  
ICE FRICTION

### ICE

Excellent adhesion on ice, snow and wet surfaces - we use an advanced and super-adhesive mixture to put winter trekking enthusiasts on a stable footing. The use of vulcanized rubber in combination with aluminum components and textile fibers guarantees 18% more grip than conventional soles.

# VIBRAM® „ICE-FRICTION“

## ICE TREK COMPOUND

With this kind of density, the rubber eases the grip on surfaces in normal conditions, and offers good resistance to abrasion because of the strong anti-wear material that covers it.

RUBBER WITH  
HIGH ABRASION  
RESISTANT MIXTURE  
Rubber with high  
abrasion  
resistant mixture and  
hydrolysis  
to grant resistance to  
wear and  
long life of the sole.

## HIGH-TECH FABRIC FOR AMAZING GRIP PERFORMANCE

This high-tech fabric was studied and created specifically for this revolutionary sole: it has specific characteristics to improve the grip performance on wet or frozen surfaces. The high-tech fabric sticks perfectly to two different vulcanizations of the rubber without affecting its resistance to sliding and abrasion.

## HIGH TECH TEXTILE FOR A NEW GRIP PERFORMANCE

## THE IDEA BEHIND VIBRAM® ICE-FRICTION

# VIBRAM® „ICE-FRICTION“ PERFORMANCE

**COMBINING HIGH-TECH  
MATERIALS (BI-MIXTURE RUBBER + FABRIC)  
HAS INCREASED THE SLIP  
RESISTANCE UP TO 25% WHILE MAINTAINING ALL THE BEST QUALITIES OF THE RUBBER SOLE.**

TESTED WHERE IT MATTERS

## GRIP CAPACITY

# TAKE-OFF TECHNOLOGY POWERED BY VIBRAM® RGS

## SALEWA TAKE-OFF TECHNOLOGY

Naturally rapid, with zero effort. Hiking is becoming ever more dynamic and orientated towards an aerobic approach to the sport: in response to this we at Salewa have integrated a revolutionary technology called Take-Off, which facilitates the rapid, natural rolling motion of the foot during ascents and descents thanks to a pre-defined positioning of the big toe a slightly raised position, with the innovative RGS sole by Vibram® equipped with a special rocker profile.

## VIBRAM® ROLLINGAIT SYSTEM

Accelerate your hiking

Vibram® Rollingait System (RGS) is an innovative midsole & sole combination that helps the natural roll of the foot. Together with SALEWA it has been adapted to the functionality of the foot and its roll during fast hiking. RGS results in optimized energy output, less muscle fatigue and more comfort and endurance.

## THE ROLLING SHAPE

Usually at the first touch-down with the ground, the center of plantar pressure moves from the heel to the metatarsus and toes. The curved shape of the innovative RGS's sole increases the contact area and supports the natural roll of the foot whenever it experiences impact with the ground. The innovative rolling shape thereby eases fluidity of motion, reduces hip and knee flexion and optimizes force transition and power output.

## THE BENEFITS

### Efficiency

The curved shape of the RGS supports the foot on his impact with the ground and accompanies it with its natural roll movement. The higher contact surface ensures higher grip at any foot posture. This increases the fluidity of motion in level/up and downhill walking, leading to a more efficient force transmission and consequently increased power output at the same muscle effort

### COMFORT AND STABILITY

Thanks to the curved shape, hip and knee flexion - usually responsible for discomfort in lower limbs during descent- are reduced, easing muscle recovery and increasing comfort even after many hours of use.

### ENDURANCE

### GO FURTHER, FASTER.

Thanks to the optimized lower limb motion, energy consumption and muscle fatigue are lowered, consequently boosting your endurance.

# MOUNTAINEERING

## ALPINISTS GO WHERE OTHERS DO NOT DARE

Optimal performance on ice, rock and mixed terrain: The more ambitious the goal, the more vital it is to have footwear that is both durable and ergonomic you can always count on. That's why we at SALEWA have developed a mountaineering line based on our key promise: Alpine fit 100% blister free.

## FLEX SYSTEM

New, more ergonomic and safer adjustment key.

### CLIMB AND WALK

Turn to "Walk" for hiking

Turn to "climb" for climbing

Turn to "climb" for ice climbing

For technical mountaineering perfect footwear is fundamental for success. SALEWA footwear stands for best in class quality, fantastic support to weight ratio, highest grade materials and innovative technical solutions that improve your performance.

#### 3D LACING

Three automatic locking points with a patented set at forefoot to ensure maximum customization in fit.

#### 3F EVO SYSTEM

Unbeatable combination of flexibility, ankle support and precision in fit. Improved with a steel wire for additional heel containment. Anatomically positioned.

#### 3S COMBI

Triple density microporous rubber midsole for ultimate edging performance on rocks. TPU Insert at heel for perfect compatibility with semi-automatic crampons.

#### MULTIPLE LASTS

Differentiated fit. Only when the foot has the space necessary is it possible to eliminate foot rubbing.

No rubbing = no blisters.

# ALPINE APPROACH

## ALPINE APPROACH

A perfect combination of technology from the most modern alpine footwear and the comfort from a hiking shoe, the new Mountain Trainer is like a second skin for the foot. Ideal for scrambling, via ferratas and demanding trekking, thanks to the upper designed to adapt to the shape of the foot together with the customizable fit of the MFF+ footbed. Support and mobility are provided by the 3F Evo System and the advanced lacing system make this shoe the winning choice whether scrambling, on via ferratas or challenging talus.

**MOUNTAIN TRAINER L:** the new generation of footwear 100% blister free! We have made them even more comfortable and hugging, thanks to the soft nubuck and the exclusive inner lining in full grain leather which enhances comfort and well-being. This model is also ideal for daily use. In addition, it is possible to personalize the fit with the MFF+ footbed, in order to make them more precise or increase the volume. We have also added lateral support utilizing the 3F system, without compromising flexibility and comfort. Grip, durability and safe foot strike are guaranteed from the tried-and-tested Alpine Approach sole by Vibram® with bumper.

#### LINING IN FULL-GRAIN LEATHER

Softness and a touch of refinement, to provide the ultimate in alpine comfort

#### MULTI FIT FOOTBED +

Thanks to the modular footbed it is possible to customize the shoe to the wearer's foot.

#### CLIMBING LACING

The advanced lacing reaches right down to the toe to guarantee precision when climbing and to enhance forefoot fit.

#### ALPINE APPROACH SOLE BY VIBRAM®

Grip, durability and safe foot placement: ideal for scrambling, via ferratas, and traversing scree. It is combined with a microporous sole with shock-absorbing rear inserts in PU to enhance comfort and cushioning.

# HIKING

## LESS EFFORT AND INCOMPARABLE COMFORT.

New SALEWA footwear is for everyone who loves mountain hikes! It unites comfort and typical Alpine expertise with new technical solutions. That's how we can facilitate the dynamics of hiking plus better regulate the microclimate of your footwear.

Speed ascent is aimed at the new generation of hikers, who seek lightweight performance which goes beyond more traditionally-styled hiking boots. The revolutionary Speed Ascent integrates two innovative technologies: the Take-Off construction, which creates a pre-fixed slightly raised position of the big toe, and the RGS sole by Vibram®, incorporating the special rocker profile throughout its length.

Thanks to extensive testing, we have achieved exceptional results in terms of:

- faster walking in ascent
- improved comfort and stability in descent
- more harmonious footstrike, resulting in reduced impact on joints
- less fatigue in ascent and descent

## SPEED ASCENT NATURALLY FAST WITH NO EFFORT

Going fast on the trail means not just working hard, but working smart. SALEWA's Take-Off technology has a pre-set position for the toes and VIBRAM's Rollingait System offers a rocker-shaped sole for quicker and safer rolling. This gets you there faster and easier – in ultimate comfort with SALEWA's 100% blister-free guarantee.

## ALP FLOW GTX

Let your feet breath! The innovative Alp Flow GTX makes the innovative GORE-TEX® Surround™ technology available for all mountain enthusiasts. For the first time even a critical area like the ball of the foot can breathe correctly during mountain hikes without compromising total waterproofness. Air can enter the upper through a special radiator placed on the sides, and reaches and refreshes the foot through a specially-perforated footbed. The superlative comfort of this shoe is finished off with ultra-soft nubuck leather and the market-leading grip of the Vibram® sole.

### GORE-TEX® SURROUND™

The GORE-TEX® laminated lining incorporated into the upper exploits channels beneath the foot and a lateral radiator to facilitate the passage of air around the foot, whilst at the same time ensuring that the shoe remains completely waterproof and breathable.

## ALP TRAINER MID GTX

Never stop hiking! The much-loved Alp Trainer Mid GTX now offers even more comfort and improved fit thanks to an optimization of its volume and the extra soft upper construction! The exclusive MFF footbed ensures individualization of a shoe's fit for your foot. The 3F System offers more support and suede split leather lends the necessary softness. The Alp Trainer is thus your ideal companion even on very long hikes in the mountains. The Vibram® Sole just for hiking and trekking ensures perfect grip, flexibility and durability. Plus, it offers the necessary cushioning when wearing heavier packs.

# TECH APPROACH

## A NEW ROCK ROUTE IS WAITING FOR YOU:

with the new SALEWA shoes the approach to the start has never been so easy! Thanks to a mix of exceptional robustness, grip, lightness, customization and ergonomics, we have raised the bar to a new level with this state-of-the-art approach shoe.

## WILDFIRE PRO HIGH TECH APPROACH

Sometimes your hike is a climb - and sometimes your climb requires a hike. Take on either one in the new Wildfire Pro, an approach shoe built to go out - and go up.

Excellent fit and durability due to the combination of leather & microfiber.

100% blister-free with SALEWA's Alpine Fit.

Outstanding precision and firm closure due to overlapping tongue.

25% increase in traction with  
VIBRAM® Megagrip sole.

DOOR TO  
SUMMIT

Sole developer partner

## WILDFIRE PRO

Door to Summit. Dedicated to mountain professionals and those who relish demanding ascents and difficult moves, without compromising the comfort of a lightweight, agile shoe. With Wildfire Pro we have combined the concept of an approach shoe with technical solutions more typically found in climbing footwear. Excellent stickiness, precise fit, a feeling which only a leather and microfiber upper can provide, which will help you ascend safely, even after the footpath ends.

### UPPER IN LEATHER AND MICROFIBER

Perfect fit and long-lasting durability.

### OVERLAP CONSTRUCTION

Inspired by rock boot design: precision and sturdy, reliable closure even on difficult moves.

### TECH APPROACH EVO SOLE BY VIBRAM® WITH MEGAGRIP COMPOUND

+25% grip! Real climbing-shoe grip, without compromising elasticity and durability.

### CLIMBING LACING

The advanced lacing system lets you adjust the fit based on the needs of the wearer to guarantee enhanced comfort and maximum precision

## WILDFIRE VENT

The grid structure of the Exa Shell wraps the upper and enhances the precision of the fit, forming a unified structure with the tried-and-trusted 3F Evo system which wraps the heel to provide support and rear holding, for excellent heel cradling, and 100% BLISTER-FREE!

### 3F EVO SYSTEM

3F Evo incorporated in the heel: excellent comfort and even more precise heel cradling and hold thanks to the rear band.

### EXA SHELL

The grid structure enhances the containment of the upper and improves forefoot balance.

### UPPER IN BREATHABLE MESH

Fresh feet and ventilation even when ascending under a scorching sun.

## FIRETAIL EVO MID GTX

Firetail Evo evolves and becomes Firetail Evo Mid. While keeping unchanged all of the features which made this the queen of approach shoes, the Firetail Evo Mid is enhanced with a higher ankle cuff to provide more versatility even in wet conditions and provide improved lateral stability. The sole is also completely new, with aggressive outsole and a special sticky compound, guaranteed by Vibram®.

### CLIMBING LACING

The advanced lacing system lets you adjust the fit based on the needs of the wearer to guarantee enhanced comfort and maximum precision

### 3F SYSTEM EVO

An unbeatable combination of flexibility, anatomic support of the ankle and perfect fit.

Highest quality Scrambler sole by Vibram. The 3-season sole unit provides excellent grip on all terrain types that a climber could encounter during crag approaches. The TC1 mixture guarantees superb elasticity and performance, even on wet terrain. Self-cleaning conical tread pattern design inhibits mud and snow build-up.

**COMFORTABLE AND BREATHABLE**  
Breathable mesh and air vents provide perfect climate comfort

**INSPIRED BY STATE-OF-THE-ART SNOW TIRE TECHNOLOGY.**  
Our designers took their inspiration from snow tire technology to beat the insidious snow in ski resort parking lots. The small rubber flaps adapt to any surface type. When combined with our special winter compound the result is safer walking and a reduced risk of accidental slips.

## THE ORIGINAL

The authentic "Boot", inspired by the unique natural quality of our mountains. Classic lines and excellent attention to detail lend "hand-crafted" styling to this footwear, making it ideal for a walk in the woods or for wearing around town. The shoe is produced from the finest home-grown Italian leathers and the styling is further enhanced by the "ideal" double stitching which gives this product a touch of class.

KIDS

## ALPINE SOCKS

#### ALPINE SOCKS – 100% BLISTER-FREE STARTS HERE

Only with specially-designed socks used together with our shoes can we avoid the creation of blisters: a 100% blister free symbiosis. Here in Salewa we know that in order to be comfortable in the mountains it is not enough to wear the best shoes; you also need socks that perform correctly. To this end, we've applied our vast knowledge of the foot and the best in materials technology to create socks with an alpine fit which are 100% blister free.

# THE ALPINE FIT

100% BLISTER-FREE

## SKI WARM WOOL PERFORMANCE SOCKS

Warm and dry feet: The Ski Warm Wool Performance socks were specially developed to maintain the correct microclimate of skiers' feet during the day – enabled by our combination of merino wool and Thermocool® yarn. You are guaranteed warm insulation and thermoregulation brought together with self-cleaning properties that prevent unpleasant odors! Breathable, seamless inserts at the instep and shin coupled with polypropylene in the footbed facilitate the release of sweat from the sock.

## PERFECT MATERIALS FOR ALPINE COMFORT 100% BLISTER FREE

### COMFORT

#### NANO **GLIDE**

To reduce to the minimum friction between skin and fabric we use a special treatment with PTFE, a material which has the second lowest coefficient of friction of all the solid materials known to man. Exceptional. And it is also extremely hydrophobic, so sweat is immediately wicked away by the sock.

### THERMAL INSULATION

Nature gives us an excellent thermal regulator: Merino wool. Dry feet which breathe thanks to this natural fiber, which is even capable of absorbing odors and has self-cleaning properties.

Dry and warm: this combination of soft yarn in ultra-thin polyester fiber and Merino wool guarantees exceptional thermal insulation and rapidly wicks away moisture from the skin, whilst at the same time trapping in warmth and ensuring feet can breathe correctly, even in the coldest conditions.

Thermocool® optimizes the natural thermal regulation capabilities of the human body, thanks to a fiber cross-section which creates channels capable of enhancing the evaporation of moisture and providing insulation at the same time.

### CLIMATE CONTROL

#### drirelease® **cotton**

Combining the warm touch of cotton with indispensable rapid drying: Drirelease® Cotton dries four times faster than normal cotton thanks to the FreshGuard treatment, keeping the garment odor free.

#### drirelease® **WOOL**

Warmer than wool: Drirelease® Wool is designed to provide excellent thermal insulation, reducing at the same time the sensation of clamminess on the skin. In addition, it does not irritate the skin and thanks to the FreshGuard treatment the garment stays odor free.

#### **ISOLFIL®**

Feet stay dry and healthy thanks to this fiber designed to ensure rapid wicking of moisture away from the skin and limit heat loss thanks to the use of polypropylene fibers.

### **CORDURA®**

Durable and abrasion resistant: this polyamide fiber boasts excellent mechanical properties combined with an extremely light weight. Perfect for preventing holes and abrasion in the most critical points in socks.

## 68058 SKI WARM WOOL PERFORMANCE SK NEW

**ACTIVITIES:** Free Ski Mountaineering - Climb to Ski, Skitouring

**PRODUCT FEATURES:**

- Alpine Fit through specific construction and functional use of yarn and structures
- Technical THERMO®COOL and MERINO WOOL fabrics: insulation and temperature regulation with a natural feel on the skin
