VERT OVERALL HEAD PROTECTION

1745 VERT FSM

RRP: WHP: NOTES:

Upwards as well as downwards - the extremely versatile Climb-to-ski helmet is the ideal compromise between the classic climbing helmet and the more fashion-conscious ski one, without foregoing safety, in any way.

FEATURES:

- Double certification (skiing and climbing)
- A streamlined shape protects the temples and the back of the head
- Lightweight
- Optimal ventilation thanks to big slots and air vents on the inside
- Removable and washable Tech Padding keeps humidity at bay and guarantees enhanced comfort
- Removable ear protections made of Tech Padding guarantee optimal ventilation and reduced volume
- Magnetic fitlock buckle
- Fully integrated ventilation for ski glasses (goggles)
- Adjusting wheel to fit different situations

HELMET CONSTRUCTION: Inmold
MATERIAL: PC, EPS
CIRCUMFERENCE: S/M (54 - 58 cm), L/XL (59 - 62 cm)
CERTIFICATIONS: EN 12492, EN 1077 (Ski, Snowboard)
SIZE: S/M - L/XL

TECHNOLOGIES HELMETS

HARDWARE

01 | LIGHTWEIGHT PROTECTION

CARBON NANO TECH (CNT) comprises a carbon nanotube-polymer composite which offers an extraordinary strength-to-weight ratio. The use of CNT in the outer shell of the Vayu helmet makes it possible to reduce the wall thickness and therefore the weight of the helmet without compromising protection. The Vayu is the first ever climbing helmet to use CNT to provide maximum safety while remaining light.

02 | SUPREME VENTILATION

Due to the exceptional stiffness of the CNT used in the outer shell of the Vayu the design of the helmet could be stretched to the limits, opening massive vents that allow for maximum airflow without sacrificing protection

03 | MULTI-IMPACT RESISTANCE

For shock absorption most helmets use EPS (expanded polystyrene), a material that will be permanently compressed when absorbing an impact. The shock-absorbing elements of the inner shell of the Vayu and Vega helmets are made from EPP (expanded polypropylene) which is a high performance plastic foam material with outstanding energy absorption. EPP protects from multiple impacts without damage.

TECHNOLOGIES HARNESSES

01

02

03

90SafX

01 | 90SAFX BUCKLE

The SALEWA 90SafX buckle meets the highest safety standards: up to an angle of 90° the buckle is completely locked, without any slippage. Once beyond 90° the buckle can be released with minimal effort thanks to our Easy-Slide-Technology. This prevents accidental loosening of the buckle while retaining ease of use. The light version is a combination of aluminum and stainless steel maximising strength to weight ratio. The basic version is made completely from stainless steel.

Vario
Webbing

03 | VARIO WEBBING

The Rock line harnesses as well as the Altitude harness use a special variable width webbing. This allows for the thinnest possible width where buckles are attached in order to save weight. In areas of high pressure the webbing is wide in order to absorb the resulting forces and distribute them evenly over the entire surface. Thus, our harnesses retain unmatched comfort.

EvoBelt

02 | EVOBELT

The SALEWA Evobelt maintains perfect symmetry on the sit harness: using a hybrid construction combines the flexibility of a floating waist belt with the advantage of a conventional sewn construction (fixed padding position). That means that the Evobelt is adjustable to any waist size allowing the gear loops to always remain on the sides within ergonomic, contortion-free reach. Once the correct position has been set slippage will not occur.

1751 ORTLES

RRP: WHP: NOTES:

Light, minimal harness for ski mountaineering, glacier travel and high altitude mountaineering.

FEATURES:

- Can be put on without taking off skis/ crampons
- Lightweight, low volume, compact and packable
- Independent closing system makes changing layers easy, even when tied in
- Unique construction gives enhanced comfort for all movement
- Four glove-friendly, easily adjustable buckles for perfect fit

TECHNOLOGIES VIA FERRATA

01 | ACTIVE SAFETY

Via ferrata sets have an energy absorber that absorbs the forces occurring in the event of a fall. All SALEWA via ferrata sets have an energy absorber designed to accommodate users weighing 40 - 120 kg (new standard) and for Premium Attac from 50-120 kg. As such, they are also suitable for heavier users carrying a full pack. Via ferrata set carabiners also have a major impact on safety. Our ERGOTEC and CORETEC carabiners have a flat design. In the event of a fall they flex under load, absorbing fall energy without breaking. In addition, all SALEWA via ferrata carabiners have a palm locking mechanism to prevent unintentional opening.

02 | COMFORT

To ensure easy handling and ergonomic user-friendliness for via ferrata use, the ERGOTEC carabiner was designed according to anthropometric data to fit the exact proportions of the human hand. Thanks to its extended grip zone and narrower construction, it fits comfortably in the hand and is easy to operate. This also applies to kids and users wearing thicker gloves. As a result, the climber spends less time holding on with just one hand when clipping and unclipping. This saves time, but most of all means that less force is required, saving energy. Tests at via ferratas, climbing walls and research conducted together with the Technical University of Munich (TUM) confirm that they save approximately 30% more time and energy. In addition to increased user comfort, this allows the user to preserve energy for more critical situations. The ERGOTEC carabiner also has an extra-large gate opening. This enables faster, easier clipping and prevents finger injuries from the steel cable.

03 | PASSIVE SAFETY

We design our via ferrata sets not just to prevent the worst in the event of a fall, but to prevent such situations altogether. Tripping is one of the main causes of accidents on via ferratas. To minimise the risk of tripping, all SALEWA via ferrata sets are designed to enable close-to-the-body carabiner handling. This is why all our via ferrata sets are fitted with abrasion-resistant bungee-style lanyards. The SALEWA ERGO ZIP goes one step further. It has a roller mechanism that continually adjusts its static webbing lanyards to the required length. On sections involving more walking than climbing, they remain close to the body without loops that could trip up the user. Should the user drop a carabiner, the risk of tripping is also virtually eliminated. Our ERGO ZIP and ERGO TEX via ferrata sets also have a tie-in loop made of elasticated webbing to keep them as close to the body as possible.

04 | FUNCTIONALITY

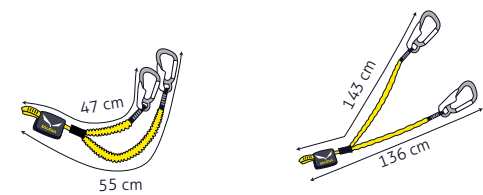

The constant detachment and attachment of the carabiners frequently results in twisting the elastic arms. This phenomenon reduces the available arm length, thus resulting in a lower operating range. The arms must be repeatedly disentangled. The SWIVEL, a swivel joint, hinders this twisting of both arms, thus guaranteeing the freedom of movement needed for climbing sets. The positioning of the SWIVEL between the arms and the belt-type fall impact absorber guarantees perfect functioning of the belt-type fall impact absorber because it is not twisted when used.

0968 ERGO ZIP

The latest version of our tried-and-tested via ferrata set. With ergonomic ERGOTEC 2.0 carabiners, shock absorber and improved, new-design roller mechanism.

FEATURES:

- Extreme safety with unsurpassed handling comfort
- Ergotec 2.0 carabiner fits the hand perfectly, even kids' hands
- Save 30% more energy with an ergonomic hand fit
- Extra-wide opening enables fast and secure clipping in and out
- Flattened shape can flex under loads without breaking
- Zip System enables close-to-the-body handling, thus eliminating the risk of trips
- Equipped with tear webbing energy absorber
- Rest loop on the energy absorber
- Suitable for 40 - 120 kg
- Made in the EU

0969 ERGO TEX

The latest version of our lightweight and compact via ferrata set. With ergonomic ERGOTEC 2.0 carabiners, shock absorber, bungee-style lanyards and integrated swivel to prevent the lanyards from getting twisted when clipping/unclipping.

FEATURES:

- Ergotec carabiner fits the hand perfectly, even kids' hands
- Ergonomic carabiner design and hand fit saves 30% more energy
- Extra-wide carabiner gate opening for fast and secure clipping and unclipping
- Flat-design carabiner flexes under load without breaking
- Bungee-style lanyards enable close-to-the-body handling
- Tear webbing energy absorber
- Rest loop on the energy absorber
- Suitable for users weighing 40 - 120 kg

ERGO BELAY SYSTEM

SMOOTH BELAYING

li-freel
Developed by Chris Semmel,
branch manager for the mountain and
skiing guide association.

1720 ERGO BELAY SYSTEM

RRP: WHP: NOTES:

Lightweight ergonomic belay device with blocking function - for climbing outdoors and indoors.

- FEATURES:**
- Responsive blocking function, with ease of release
 - Ergonomic and intuitive handling, design accommodates risk of user error
 - Ideal for lead belaying: faster rope feeding, quick and smooth transition between locked and unlocked state
 - Easily controlled lowering action
 - Maximum safety, design ensures braking hand remains on the rope at all times
 - Spare part /accessory: 1718 HMS BELAY TWIST LOCK carabiner

3995 night

CERTIFICATIONS: EN 15151, UIAA 129
ROPE DIAMETER: 8,6 - 11 mm
MATERIAL: Alu 7075 T6
SIZE: 70x20x40mm
WEIGHT: 170 g

1484 ALPINE TUBER

RRP: WHP: NOTES:

Lightweight alpine belay and rappel device.

- FEATURES:**
- Function for both belaying and rappelling
 - For ropes with a diameter of 7.7 to 11mm
 - Friction-free handling due to large rope guiding slots
 - Suitable for up to 2 followers on belay
 - Deep braking grooves for easy release
 - Safety markings on both sides for left and right-handers

3995 midnight blue

CERTIFICATIONS: EN 15151
ROPE DIAMETER: 7,7 - 11mm
MATERIAL: Aluminium 7075 T6
WEIGHT: 84 g

1160 ROCKHAMMER

The ideal, well-balanced hammer for securing bolts.

FEATURES:

- Grommet on the nose to pull out bolts
- Cord for attaching to harness or pack
- Low vibration thanks to a polyamide shaft
- Lightweight

MATERIALS DESCRIPTION: Steel/Polyamid
LENGTH: 265 mm
WEIGHT: 580 g

0955 black/ yellow

0410 UNIVERSAL 100MM

0411 UNIVERSAL 70MM

Diagonal piton made of tempered steel with a 45° angled head.

FEATURES:

- Ideal for medium-width cracks
- For hard rock (e.g. granite)

	0410	0411
WEIGHT:	125 g	70 g
LENGTH:	100 mm	70 mm

0900 black

0414 SOFTY 90MM

0415 SOFTY 70MM

Soft metal piton made of zinc-plated, untempered steel with a rounded tip.

FEATURES:

- Softer steel adapts to the crack
- For use on softer rock (limestone, Dolomite)

	0414	0415
WEIGHT:	110 g	90 g
LENGTH:	90 mm	75 mm

0999 steel

0412 BLADE PITON 75MM

0413 BLADE PITON 55MM

Tempered steel piton with a tapered tip.

FEATURES:

- For hard rock (e.g. granite)

	0412	0413
WEIGHT:	110 g	90 g
LENGTH:	75 mm	55 mm

0900 black

0640 MASTER CORD 6MM PRECUT

Pre-cut, high-strength rope for the knotting of slings and for use during alpine climbing and technical mountain climbing.

FEATURES:

- Available in 4 lengths
- Lightweight and high strength (>15kN); lighter and stronger than Kevlar
- Sealed ends
- Ultra high-strength polyethylene (same as Dyneema)
- High UV resistance
- Areas of application: stand construction, intermediate fixing point, extended stand construction, belaying, prusik, pulley, threading

1715 QUICK SCREW

RRP: WHP: NOTES:

The Quick screw for ice climbing is so easy to handle thanks to its ergonomically designed head and comes with a fixed screw cap, easily removed with one hand.

FEATURES:

- Ergonomic head means easy handling and efficient placing of the ice screw
- Winder with large handle for fast and effortless tightening
- Ideal screw placing thanks to compact head and direct attachment of harness loop to screw shaft
- Compact construction avoids overloaded climbing harness
- Colour coding for easy length differentiation
- Integrated screw tip protector (patent registration in progress) won't get lost, prevents injury and damage to clothing
- Screw tip protector fixes screw in place until used, easily removed with one hand
- During removal from the ice, screw can remain clipped to rope and won't get lost
- Three lengths available

1742 NORTH-X

RRP: WHP: NOTES:

1741 NORTH-X HAMMER

RRP: WHP: NOTES:

A versatile ice axe which masters all activities related to technical mountaineering, without compromises: Approach, Climbing in steep mixed or ice terrain, building an anchor, crossing glaciers.

FEATURES:

- The precision casted head is carried comfortably as a mean of support.
- Its aggressive blade sits securely in every type of ice and rock.
- A balanced weight distribution and a 20° offset shaft guarantee an optimal swing and allow for efficient belay mounting.
- Single handed, the grip can be adjusted without any supporting tool and guarantees a perfect hold on steep terrain.
- The anchor leash on the shaft, with tearing support of 5kN, is perfect for the self belay on the anchor.
- The grip can move upwards in snow and does not prevent the setting up of an anchor and its function as a supporting tool.
- The synthetic grip protects from the cold.
- The replaceable hard metal tip won't slip even on icy surfaces
- Available with adze and hammer.
- Spare part /accessory: 1094 PICK GUARD, 1753 SPIKE FOR ICE AXE, 1752 HANDREST FOR ICE AXE, 1744 NORTH-X BLADE, 1743 LEASH

NEW 2629 RAZOR

RRP: WHP: NOTES:

Makes no compromises when it comes to safety - this large, sturdy avalanche shovel is a potential lifesaver.

- FEATURES:**
- Shovel made of high-strength, tempered aluminium
 - Extra-sharp blade edge - cuts through the toughest avalanche snow
 - Shovel blade with parallel edges prevents snow compressing further thus reducing effort required
 - Horizontal tread zone saves footwork effort and stops foot slipping when shovelling
 - Ergonomic Progrip telescopic shaft for perfect handling
 - Robust plastic D-grip practical to hold and doesn't break
 - Holes in blade for use as a snow anchor

WEIGHT: 720 g
SHAFTLENGTH: 90 cm (max)
PACKING SIZE: 47 x 23 cm
SHOVEL BLADE: 31 x 23 cm
MATERIAL: Alu 6061 T6

3995 midnight blue

NEW 2625 SCRATCH

RRP: WHP: NOTES:

Absolutely vital life-saving equipment due to lightweight and compact design: the perfect shovel for those aiming for the very top.

- FEATURES:**
- Shovel made of high-strength, tempered aluminium
 - Extra-sharp blade edge – cuts through the toughest avalanche snow
 - Shovel blade with parallel edges prevents snow compressing further thus reducing effort required
 - Horizontal tread zone saves footwork effort and stops foot slipping when shovelling
 - Ergonomic Progrip telescopic shaft for perfect handling
 - Holes in blade for use as a snow anchor

WEIGHT: 560 g
SHAFTLENGTH: 79 cm (max)
PACKING SIZE: 39 x 20 cm
SHOVEL BLADE: 28 x 20 cm
MATERIAL: Alu 5052 T6

TECHNOLOGIES

POLES

01 | CARBONIUM CONCEPT

Carbon poles have a number of advantages over aluminium poles. They are lighter, significantly stiffer and have a longer lifespan as they don't corrode. However, carbon is more brittle and can break easier, for example after impact loading. This is why the SALEWA CARBONIUM SERIES poles have a hybrid construction. The top sections of the poles are made of carbon. The bottom section has the most contact with rocks and ledges and is subjected to greater bending and loading so it's made from a stronger metal (high-strength aluminium such as Titanal). This gives them the required robustness for alpine use.

02 | ADJUSTMENT

The Powerlock-System that features on the SALEWA CARBONIUM SERIES poles in two different versions locks reliably and is easy to use. And it allows quick and easy height adjustment for a perfect fit. The high-strength aluminium version lock mechanism on the Carbonium Ascent has the additional advantage that it functions in fluctuating temperatures.

03 | GRIP

The SALEWA CARBONIUM SERIES grips are designed specifically for different activities. By carefully combining different materials, the grips on the Carbonium Ascent and Carbonium Tour ensure that the pole fits comfortably in the hand in every position. If the user shifts their grip position, the ergonomic design prevents it from slipping while the EVA foam is pleasant to the touch. Smoother material at the knob prevents blisters. The Carbonium Alp Speed grip is extra-long to enable rapid grip changing, for example when running on mountain ascents and descents. Its comfortable EVA foam prevents slipping. The extended grip zone with G-Reptile grip tape on the Carbonium Ascent makes it easier to change grip position at virtually no extra weight.

2626 CARBONIUM ASCENT

Robust and reliable pole for mountaineering use in all terrain, including extreme conditions.

FEATURES:

- 3-piece telescopic pole made of carbon; bottom section is made from high-strength aluminium to cope with rocks and scree
- Ergonomic dual-component EVA foam and plastic grip easily allows a variety of positions in uneven terrain
- Reptile grip tape for extended grip zone allows rapid changing of position and good grip
- Padded strap
- High-Aluminium Powerlock system for reliable locking and adjustment, including in fluctuating temperatures
- Supplied with ice flex tips and winter baskets
- Spare part /accessory: 5270 SKITELLER, 5271 WANDERTELLER

WEIGHT: 240 g each
SIZE: 68-142,5cm
PACKING SIZE: 68cm
MATERIAL: Carbon, Titanal

RRP: WHP: NOTES:

2410 yellow

2628 CARBONIUM ALP SPEED

Lightweight, compact folding pole for high-speed mountain sports.

FEATURES:

- 4-piece hybrid construction pole; bottom section is made from strong Titanal to cope with rocks and scree
- Very small pack size (46cm)
- Ergonomic EVA foam grip with longer grip zone easily allows a variety of positions in uneven terrain
- Padded strap
- Simple, fast adjustment via carbon-reinforced plastic Powerlock system
- Spare part /accessory: 5270 SKITELLER, 5271 WANDERTELLER

WEIGHT: 275 g each
SIZE: 46-130cm
PACKING SIZE: 46cm
MATERIAL: Carbon, Alu 7075 T6

RRP: WHP: NOTES:

BACKPACKS CARRYING SYSTEMS

Fit is the most important feature of a backpack. Backpacks are somewhat like full suspension systems. They must react to every move you make.

CONTACT-FIT

Less pack movement thanks to the way it sits closer on your back.

CONTACT FIT LITE

Lightweight carrying system with a snug fit that adapts to your back for reduced pack movement and good ventilation.

AIR-FIT

Superior ventilation due to improved airflow between user and backpack.

CUSTOM FIT

Easy-adjust carrying system for an individualised fit.

CUSTOM FIT PRO

Easy-adjust carrying system for an individualised fit in men's and women's specific versions.

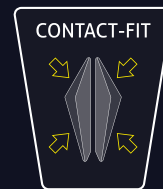

EASY-FIT

Comfortable fit due to smart use of padding.

BACKPACKS

MOUNTAINEERING

CONTACT-FIT CARRYING SYSTEM

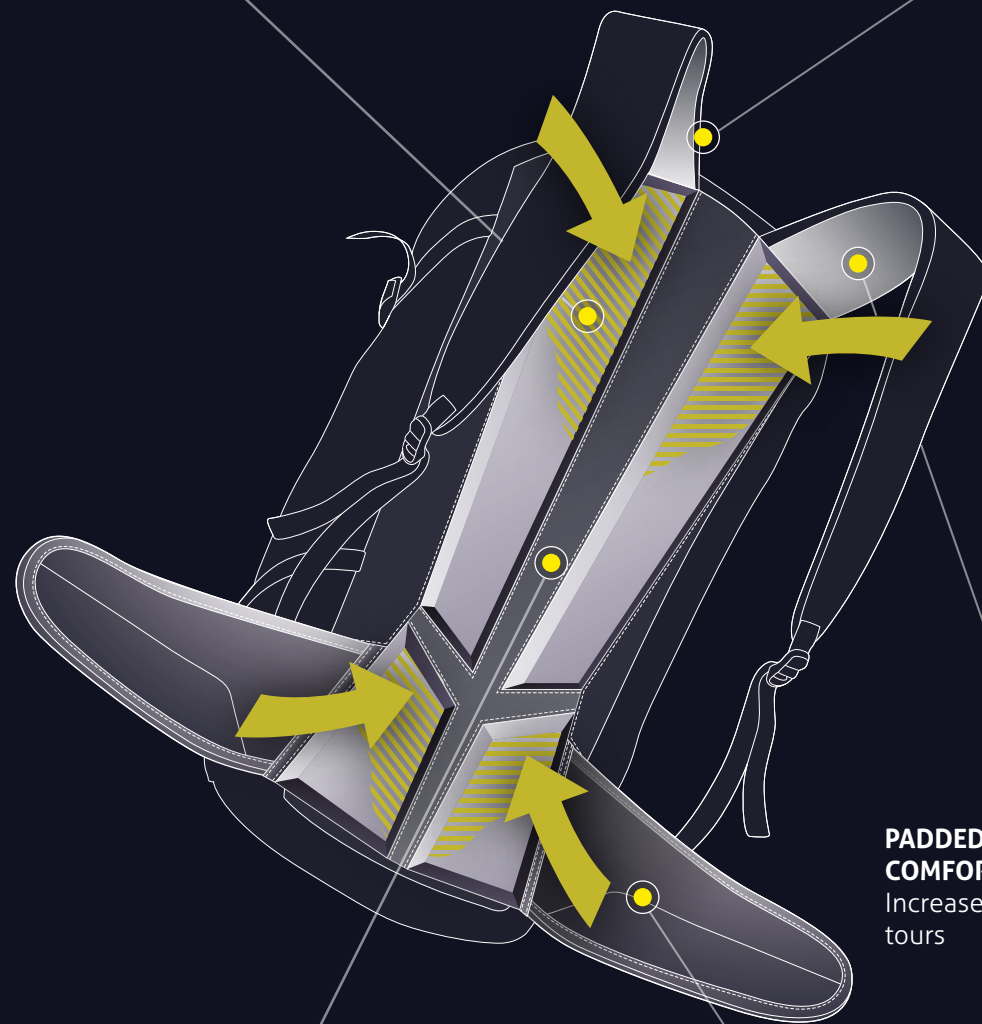

ANATOMICALLY SHAPED BACK PADDING

Creates optimal contact between pack and user, ensuring an evenly distributed load. Perfect fit makes it well suited for Alpine use

LOAD CONTROL STRAPS

Ensure optimal back fit

PADDED SHOULDER STRAPS AND COMFORTABLE BACK PADDING

Increase comfort even on lengthy tours

ERGONOMIC BACK PANEL

An ISB board serves to stabilize the back and can be removed if needed to cut additional weight

REMOVABLE HIPBELT

Ensures the best possible comfort when wearing a climbing harness

KEY FEATURES

MOUNTAINEERING

01 | GEAR LOOP ON HIP BELT

Quickly and safely attach gear, such as carabiners, quickdraws and ice screws.

02 | REMOVEABLE HIP FIN

Eliminates weight in a few steps, or helps to prepare the backpack for a climb

03 | TIE ON POINTS FOR MULTIPLE USE

Eliminates weight in a few steps, or helps to prepare the backpack for a climb

04 | ALARM WHISTLE

Good for emergencies, or to simply draw attention to yourself

05 | ICE AXE/ POLE FASTENING

Fixed in place, the icepick is safely stored away and can be retrieved just as quickly

SPEED AND
SIMPLICITY

Strong, but low weight due to smart use of fabrics.

Easy ice-axe fixation.

Quick access to mountaineering equipment on your harness due to v-shape that follows the bodily form.

APEX 22 BACKPACK

FOR SPEED MOUNTAINEERING ESSENTIALS

KEY FEATURES

SKI MOUNTAINEERING

01

02

03

04

05

01 | INNOVATIVE, DIAGONAL SKI ATTACHMENT

The new fastening geometry of the ski safe system guarantees perfect support, thus ensuring transport that's gentle on your body and the skis.

02 | FULLY INTEGRATED PICKAXE COVER

Fixes pickaxe safely in place before the run. Thanks to attachment loops, also easy to use with gloves on.

03 | SIDE ACCESS PROTECTS FROM SNOW

Zipper is shifted to the back on purpose to keep the snow away from backpack contents and back panel when you put your gear down.

04 | SPACIOUS SAFETY COMPARTMENT

For storage of your entire safety equipment - shovel blade, probe and shovel handle, additionally secured with two loops.

05 | HIP BELT POCKET

Valuables such as money, camera and mobile are well taken care of here

KEY FEATURES

SPEED HIKING

01 | TWIN COMPRESSION SYSTEM (TCS)
Quick and easy front and side compression with just one pull

02 | REFLECTIVE PRINT
For better visibility at night

03 | LOWER STERNUM STRAP
In conjunction with the load control strap, the lower sternum strap pulls the shoulder straps closer to the centre of the body, for greater freedom of movement and load control

04 | ON THE GO POCKETS
Slanted mesh side pockets for quick and easy access to important items without having to remove your pack

BACKPACK

HIKING

AIR-FIT CARRYING SYSTEM

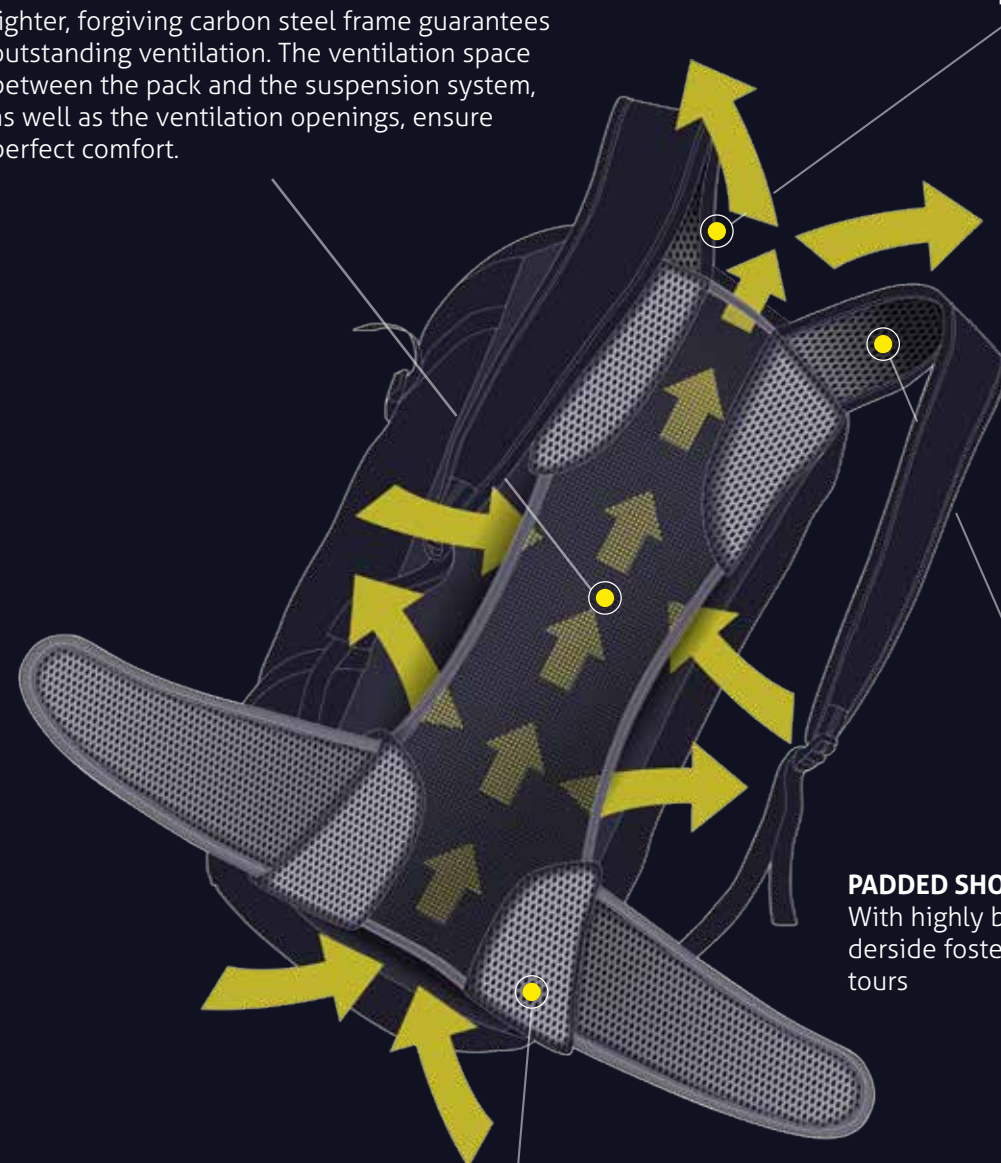

AIR-FIT MESH CARRYING SYSTEM

The combination of mesh in the back area and a lighter, forgiving carbon steel frame guarantees outstanding ventilation. The ventilation space between the pack and the suspension system, as well as the ventilation openings, ensure perfect comfort.

LOAD LIFTER STRAPS

Ensure optimal back fit

PADDED SHOULDER STRAPS

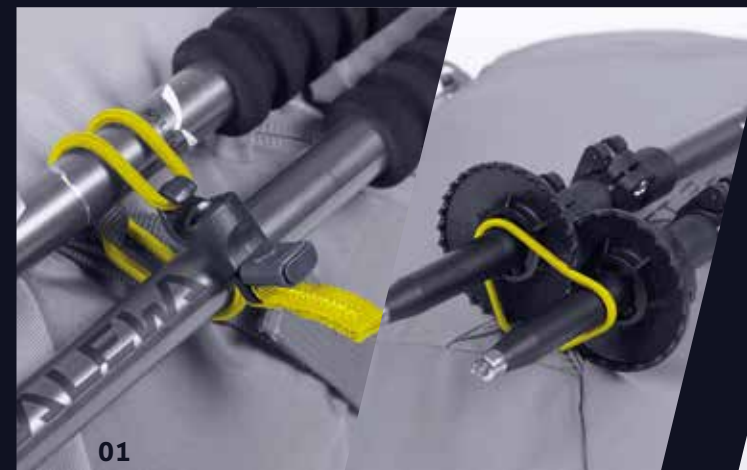

With highly breathable mesh on the underside foster comfort even on lengthy tours

MESH PADS IN THE LOW BACK

Optimize the load distribution and thus increase comfort

KEY FEATURES

HIKING

01

02

03

04

05

01 | POLE FASTENING

Convenient and secure storage and safe transport for skis and hiking poles

02 | HIP BELT POCKET

Valuables such as money, camera and mobile are well taken care of here

03 | SIDE POCKETS

Highly versatile and flexible storage space for water bottle, thermos and anything else you want at your fingertips

04 | SEPARATE FRONT COMPARTMENT

For direct access to anything that's important - cards, granola bars or cell phone

05 | RAINCOVER

Provides backpack with reliable protection against rain and mud

TECHNOLOGY

SLEEPING BAGS

SILVERIZED 100% FRESH

REVOLUTIONARY: FRESH DOWN
SALEWA has developed the world's first silver treatment for down fillings.

Clinical studies show that silver is effective against the bacteria that cause odours. Bacteria metabolise sweat and body moisture, emitting waste products that produce strong odours in a sleeping bag. The resultant odour is unpleasant. Silver ions destroy enzymes within the bacteria that are necessary for them to live. The bacteria die off without these enzymes.

Down benefits as follows: reduction of unpleasant smells caused by bacteria. This means that a treated sleeping bag doesn't smell, even after intensive use. This silverized down treatment dispenses with the need for two stages of chemical dipping, and so reduces the negative impact on the environment. Best of all: For the first time a down sleeping bag is a viable alternative for those suffering from dust allergies, where previously they had to rely on synthetic fillings.

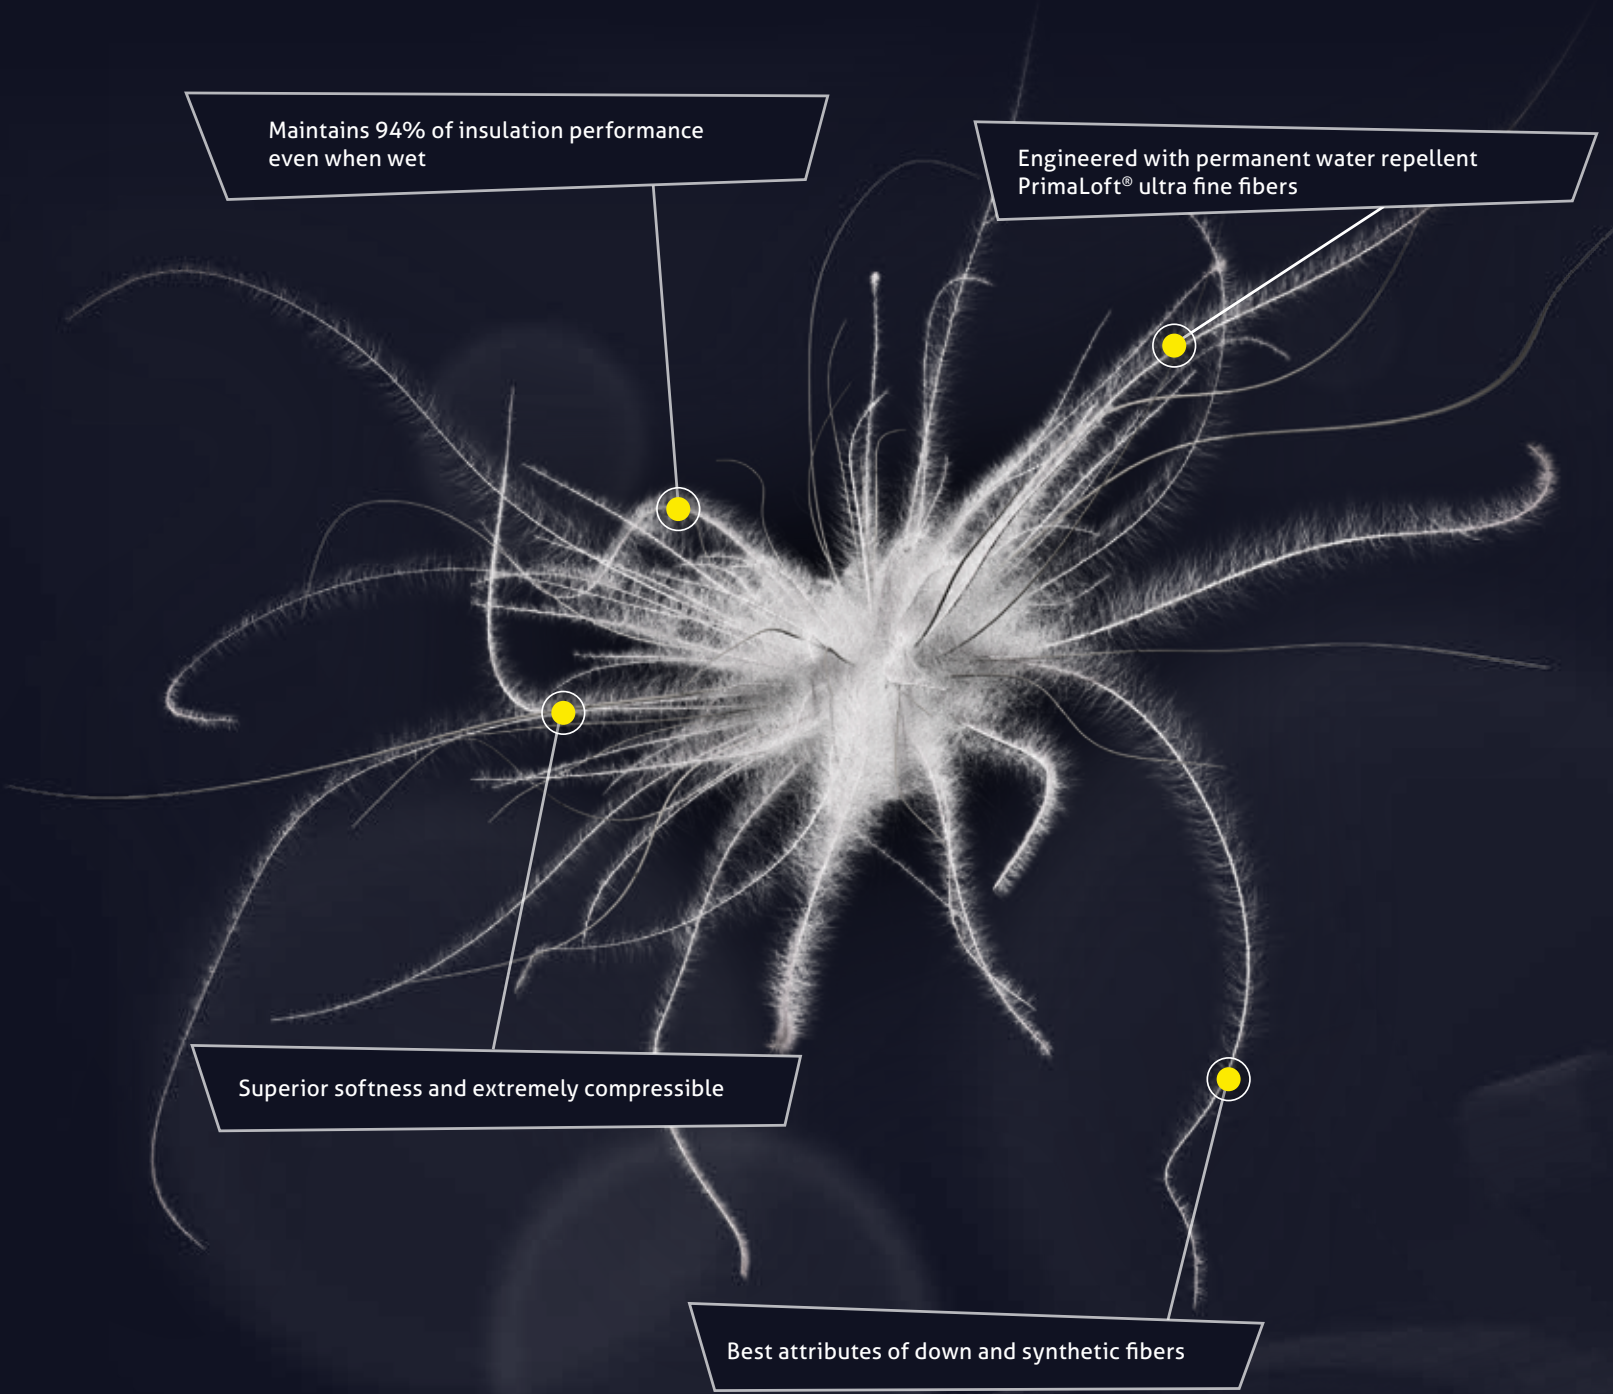

Biocidal treatment based on silver chloride prevents proliferation of odour-producing bacteria.

PRIMALOFT® PERFORMANCE DOWN BLEND

PrimaLoft® Performance Down Blend are the ultimate hybrid of PrimaLoft® ultra-fine fibers and water repellent down that offers warmth equivalent to down of great quality and permanent water-resistance that maintains 94% of its warmth even when wet. This game-changing innovation has all the lightweight warmth, loft, packability and comfort of standard down, but with outstanding wet-weather thermal performance that dries 4x faster. Made with an environmentally safe technology free of fluorocarbons, PrimaLoft® Performance Down Blends push the boundaries of what your gear can accomplish.

OLD FOR NEW

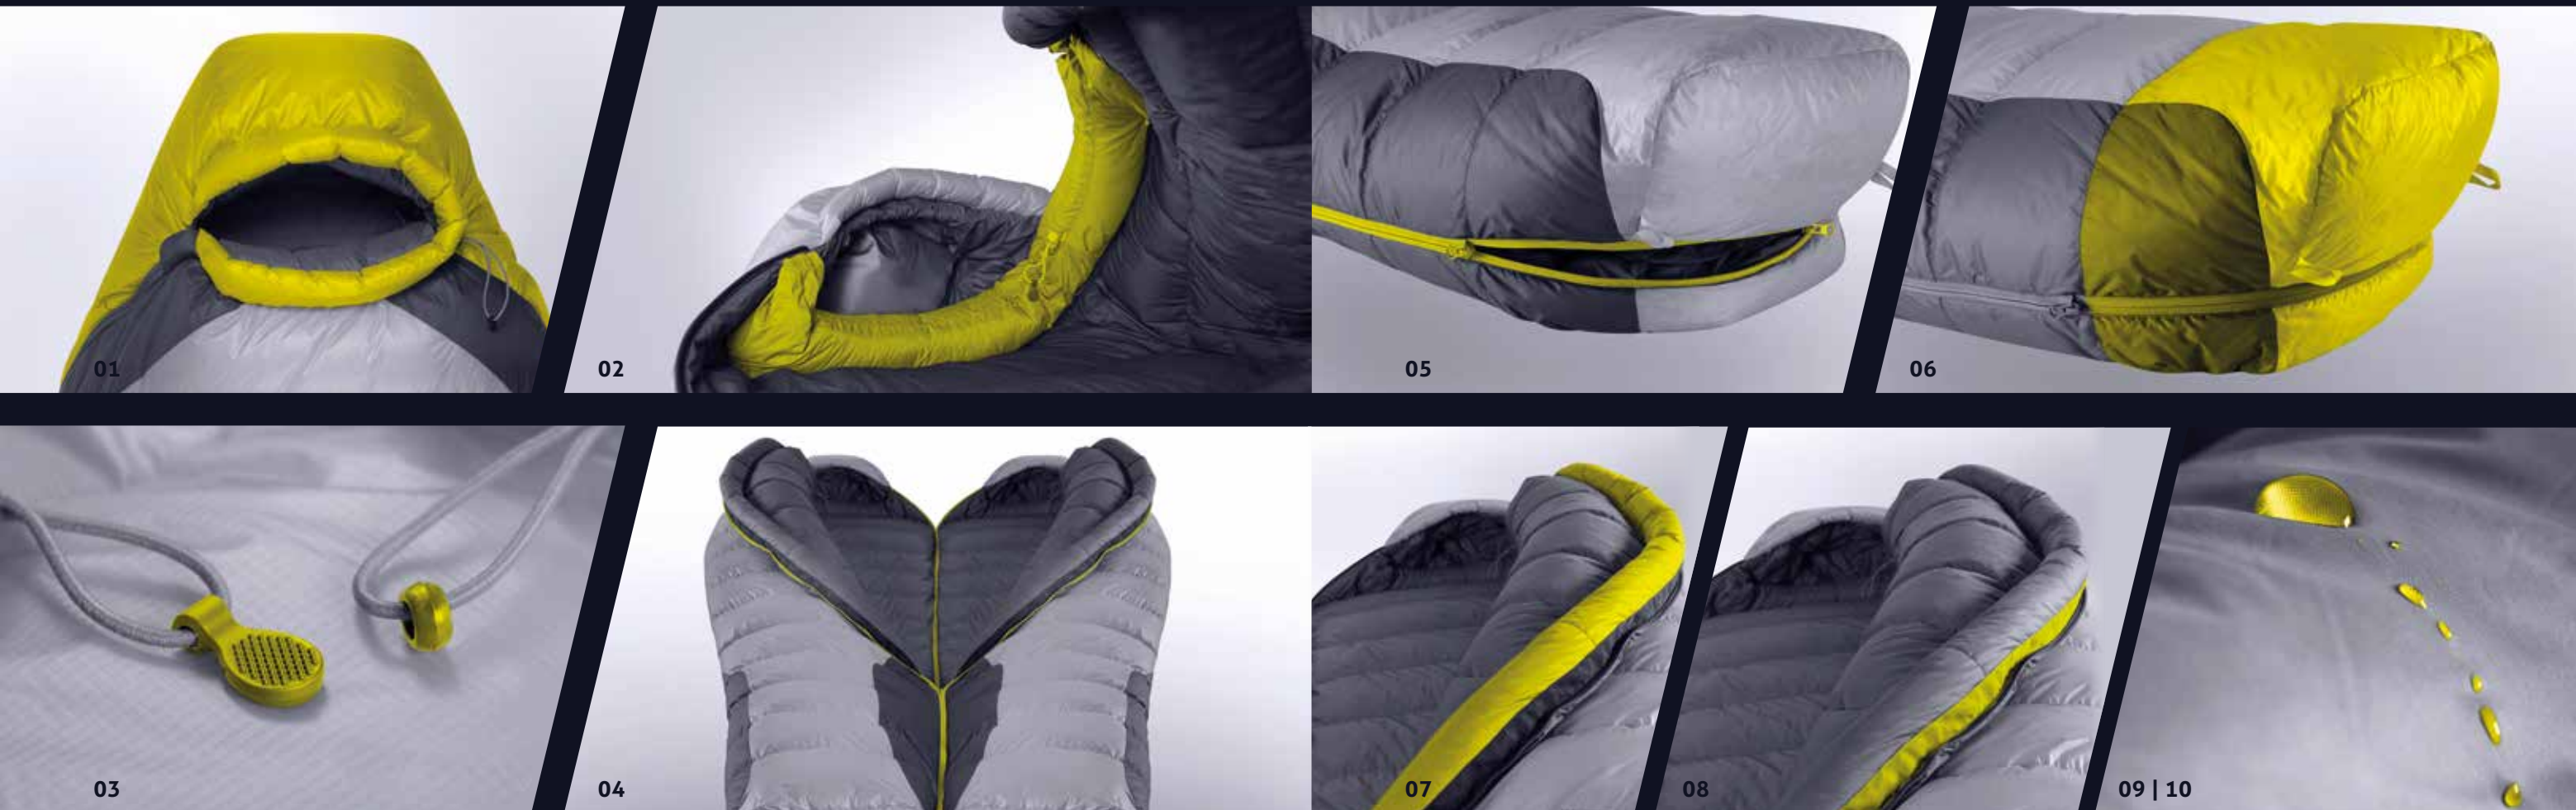

RECYCLE YOUR DOWN SLEEPING BAG AND GET 20% DISCOUNT ON A NEW SALEWA SLEEPING BAG.

Your old sleeping bags have rested long enough – it's time to wake them up and turn them into something new.

KEY FEATURES

SLEEPING BAGS

01 | FUNCTIONALLY CUT HOOD

including convenient eye and nose protection for cold nights in the bivouac

02 | PRE-FORMED THERMO COLLAR

The innovative fit is an efficient way of preventing heat loss through movement

03 | ONE- HANDED DRAW STRINGS USE

Different Cord pullers make all draw strings easier to use

04 | FULL-LENGTH TWO-WAY YKK ZIPPER

For effortless linkage with other sleeping bags

05 | FOOT SECTION WITH ZIPPER

The practical opening at the foot makes for added ventilation and maximum comfort

06 | PRE-SHAPED ERGONOMIC FOOT SECTION

The interior liner has a snug fit ensuring better insulation by adapting to the foot's natural position

07 | LARGE INSULATING DRAFT TUBE

Prevents cold air from penetrating through the zipper - pleasant temperatures always guaranteed

08 | ZIPPER WITH ZIPPER WITH ANTI CATCH FLAP

Quick opening and closing without snagging or pinning material in the zipper chain

09 | DURABLE WATER-REPELLENT (DWR) OUTER MATERIAL

The special outer shell keeps you dry and warm even on damp nights

10 | DURABLE WATER-REPELLENT (DWR) AND SOFT INTERIOR

The lining protects against moisture at all times while creating an optimal indoor climate

*Variant features in the MICRO series
