THE ALPINE FIT - 100% BLISTER-FREE

01 | CUSTOMIZED FIT

Customizable Fit technologies allow you to tailor your fit to the unique shape of your foot – giving you all-day support to accommodate the range of movements necessary for any adventure in the mountains.

02 | GRIP & TRACTION

Outsoles are specially developed to produce excellent traction and durability in any conditions, without compromising comfort.

POWERED BY MICHELIN® TECHNICAL SOLES
MICHELIN

Vibram

03 | HEEL LOCKING

Heel containment guarantees a combination of flexibility, ankle support and precise fit to prevent the formation of blisters.

04 | ERGONOMICS IN ACTION

State-of-the-art ergonomic technologies help to effectively wrap and support the foot, in order to gain the best sporting performance.

05 | CLIMATE CONTROL

Climate Control ensures optimum temperature and humidity in your shoe, even during highly aerobic activities.

GORE

TECHNOLOGY

3F

The trademark SALEWA 3F System connects the instep area of the shoe with the sole and heel; ensuring flexibility, support and the correct fit where it's needed.

MULTI FIT FOOTBED

The Multi Fit Footbed provides instant comfort and stability to your foot by allowing you to customize your fit with a removable MFF insole layer.

MULTI FIT FOOTBED +

The innovative multi-layer MFF+ allows for more customization on the forefoot by using two interchangeable layers to accommodate a greater range of foot shapes and sizes.

*Insole layers included separately in box.

FLEX COLLAR

The FLEX COLLAR increases the ankle's rear range of motion and comfort during descents, thanks to a curved shape that follows the plantar flexion of the ankle.

EXA SHELL

The EXA Shell grid structure wraps around your upper foot, providing you with a precise fit and perfect front-foot balance. The shell also minimizes abrasion of the upper material.

CLIMBING LACING

Climbing Lacing offers accurate adjustment in the toe-area of your shoe, giving you more support and performance when tackling technical terrain.

3D LACING

3D Lacing divides the lacing system into two individually adjustable sections (forefoot and midfoot). This allows you to fine tune the fit for your customized balance of comfort and performance.

OVERLAP CLOSING

Overlap Tongue Construction provides perfect wrapping and superior comfort in the arch area.

MOTION GUIDANCE

The sole and midsole are developed in synergy to support the natural movement of the foot and provide excellent sure-footedness over any terrain.

3S COMBI SYSTEM

Multi-density microporous rubber midsole for ultimate edging performance on rocks. TPU insert at heel for perfect compatibility with semi-automatic crampons.

FULL-PRO SOLE

An ergonomic and sturdy Pebax® midsole, to match walkability and perfect compatibility with full-automatic crampons.

BILIGHT MIDSOLE

Ergonomic, long-lasting and durable cushioning. Its ergonomic shape and mechanical properties provide superior shock absorption even on steeper terrain for greater comfort than a standard sole.

FERRATA ZONE

Specific right-angled lugs in the midfoot tread zone maximize force applied through the foot. This provides better grip, e.g. on via ferrata rungs and ladders.

STRETCH GAITER

Designed to keep out trail debris, such as grit and leaves.

ANTI-DEBRIS STRETCH GAITER

Designed to prevent debris, stones and gravel from getting into your shoe.

ANTI-ROCK HEEL CUP

Stability and durable protection on even the toughest trails.

SWITCHFIT ADJUSTMENT

To quickly switch from hike to climb mode. By lacing the additional offset eyelet, the heel is pulled in and the foot is pushed forward into the toe area. This compresses the toes, the same way as in climbing shoes, to increase the ability to stand on smaller holds with greater precision.

EDGING PLATE

This special insole plate provides greater stiffness under the toes without affecting flexibility in the rest of the shoe. For greater climbing precision, but still with full walking comfort.

EXTERNAL TOE CAP

Increases comfort on the long run by keeping its shape and properties substantially unchanged in comparison to the traditional internal reinforcements in the toe box.

GUMFLATE

GUMFLATE

Adapts to the ground, providing a wider contact area for greater grip. Offers more comfort by reducing pressure points under the sole.

TECHNOLOGY

ALPINE GRIP

POMOCA
SWISS MADE

MOUNTAINEERING

01 | VIBRAM WTC

Aggressive tread and a minimalistic profile provides a natural feel for optimal traction, lightness and walkability.

02 | VIBRAM NEW MULAZ

Ideal for most mountaineering conditions, the outsoles are self-cleaning, grippy and offer traction on soil.

03 | VIBRAM SALEWA PRO

A unique SALEWA/Vibram® outsole, with aggressive lugs that offer a new level of grip on mud and snow. The climbing toe profile offers a new level of edging performance.

TECH APPROACH

04 | POMOCA SPEED MTN PRO

Developed for the most demanding approaches, with a mix of rocky and soft ground, such as mud and grass. Thanks to the deep, well-spaced blocks, traction and self-cleaning are guaranteed, as is grip on both dry and wet surfaces, thanks to the POMOCA® butyl compound.

05 | POMOCA SPEED MTN

The Speed MTN sole is characterized by a balanced ratio between grip and traction. Grip is given by the new POMOCA Butylic compound, performing at high level both on dry and wet hard surfaces. On the other side on mud and soft terrain traction is guaranteed

by the special lug profile. A sole for fast mountain approaches or traversing with constant grip.

ALPINE TREKKING

06 | VIBRAM HIKE APPROACH

Outsoles with the necessary grip, flexibility and durability to tackle the most demanding excursions in complete safety.

07 | MICHELIN® WANDER HIKER

The deep wavy base adapts to the ground giving an increased contact area for better grip and shock absorbency. The wide contact base, aggressive sculptures and MICHELIN® Outdoor

Compound provide optimal stability and traction on uneven terrain.

08 | VIBRAM MTN TRAINER EVO

Self-cleaning outsoles with deep grooves and aggressive lugs that guarantee traction on mud, snow and ferratas' ladders.

09 | VIBRAM OBAN SOLE

Optimum balance between traction, flexibility and self-cleaning. This outsole is designed to provide superb grip and adaptability in mixed mountain terrain.

10 | POMOCA ALPEN SOLE

Design studied to provide progressive walking and high traction, to tackle the most demanding excursions in complete safety and comfort.

SPEED HIKING

11 | MICHELIN® LITE TRAIN

Aggressive sculptures and groove design combined with the MICHELIN® Outdoor Compound for great traction and adaptability on soft and uneven terrain.

12 | MICHELIN® ULTRA TRAIN

Lower grooves, small sculptures, longitudinal flex grooves, and the MICHELIN® Outdoor Compound provide outstanding traction and stability over hard terrain.

13 | POMOCA® SPEED HIKING SOLE

Designed for natural rolling and great traction. The S Path keeps the foot's centre of pressure on the terrain. And the aggressive lug design performs in different terrain and weather conditions.

THE ALPINE FIT

MOUNTAINEERING

Mountaineering boots have to handle the toughest terrain, with or without full or semi- automatic crampons. They provide a precise, technical fit and good support.

01 | BILIGHT MIDSOLE

Ergonomic, long-lasting and durable cushioning. Its ergonomic shape and mechanical properties provide superior shock absorption even on steeper terrain for greater comfort than a standard sole.

03 | 3D LACING

3D Lacing divides the lacing system into three individually adjustable sections (forefoot and midfoot). This allows you to fine tune the fit for your customized balance of comfort and performance.

05 | MULTI FIT FOOTBED +

The innovative multi-layer MFF+ allows for more customization on the forefoot by using two interchangeable layers to accommodate a greater range of foot shapes and sizes.

*Insole layers included separately in box.

07 | OVERLAP CLOSING

Overlap Tongue Construction provides perfect wrapping and superior comfort in the arch area.

09 | FULL-PRO SOLE

An ergonomic and sturdy Pebax® midsole, to match walkability and perfect compatibility with full-automatic crampons.

02 | EXTERNAL TOE CAP

Increases comfort on the long run by keeping its shape and properties substantially unchanged in comparison to the traditional internal reinforcements in the toe box.

04 | FLEX COLLAR

The FLEX COLLAR increases the ankle's rear range of motion and comfort during descents, thanks to a curved shape that follows the plantar flexion of the ankle.

06 | 3F

The trademark SALEWA 3F System connects the instep area of the shoe with the sole and heel; ensuring flexibility, support and the correct fit where it's needed.

08 | 3S COMBI SYSTEM

Multi-density microporous rubber midsole for ultimate edging performance on rocks. TPU insert at heel for perfect compatibility with semi-automatic crampons.

ENGINEERED IN THE
HEART OF THE DOLOMITES

ALPINE FIT

TECH APPROACH

Our Tech Approach footwear combines cushioning and flexibility, with a precise fit and performance climbing soles.

01 | SWITCHFIT ADJUSTMENT

To quickly switch from hike to climb mode. By lacing the additional offset eyelet, the heel is pulled in and the foot is pushed forward into the toe area. This compresses the toes, the same way as in climbing shoes, to increase the ability to stand on smaller holds with greater precision.

02 | EDGING PLATE

This special insole plate provides greater stiffness under the toes without affecting flexibility in the rest of the shoe. For greater climbing precision, but still with full walking comfort.

03 | EXA SHELL

The EXA Shell grid structure wraps around your upper foot, providing you with a precise fit and perfect front-foot balance. The shell also minimizes abrasion of the upper material.

04 | 3F

The trademark SALEWA 3F System connects the instep area of the shoe with the sole and heel; ensuring flexibility, support and the correct fit where it's needed.

05 | CLIMBING LACING

Climbing Lacing offers accurate adjustment in the toe-area of your shoe, giving you more support and performance when tackling technical terrain.

POMOCA BUTYLIC COMPOUND

POMOCA® Butylic Compound provides high-performance grip on both dry and wet surfaces.

ORTHOLITE FOOTBED

Long-term cushioning, high breathability and unique moisture management. This lightweight, washable OrthoLite footbed provides unparalleled comfort.

ANTI-DEBRIS STRETCH GAITER

Designed to prevent debris, stones and gravel from getting into your shoe.

ALPINE FIT

SPEED HIKING

Our Speed Hiking footwear combines the lightweight design and grip of a trail running shoe with the support and protection required by hiking footwear.

01 | MOTION GUIDANCE

The sole and midsole are developed in synergy to support the natural movement of the foot and provide excellent sure-footedness over any terrain.

03 | STRETCH GAITER

Designed to keep out trail debris, such as grit and leaves.

ORTHOLITE FOOTBED

Long-term cushioning, high breathability and unique moisture management. This lightweight, washable OrthoLite footbed provides unparalleled comfort.

POMOCA BUTYLIC COMPOUND

POMOCA® Butylic Compound provides high-performance grip on both dry and wet surfaces.

02 | 3F

The trademark SALEWA 3F System connects the instep area of the shoe with the sole and heel; ensuring flexibility, support and the correct fit where it's needed.

04 | ANTI-ROCK HEEL CUP

Stability and durable protection on even the toughest trails.

OCX COMPOUND BY MICHELIN® TECHNICAL SOLES

MICHELIN® Outdoor Compound X for ultimate adherence on wet and slippery surfaces.

POMOCA® S PATH

The S Path is designed to keep the foot's centre of pressure on the terrain and support natural rolling.
